

Important information for investors

This document contains important information for investors about this collective investment scheme. It does not comprise marketing material. This information is prescribed by law in order to explain to you the nature of this collective investment scheme and the risks of an investment. We recommend you to read this document in order to be able to make an informed investment decision.

Avadis Vermögensbildung SICAV - Equities strategy
 A subfund of Avadis Vermögensbildung SICAV (ISIN: CH0032831981)
 Fund management: Lombard Odier Asset Management (Switzerland) SA

Investment objectives and investment policy

The equities strategy comprises an umbrella fund consisting exclusively of institutional target funds. On a consolidated basis, the strategy invests a minimum of 66% in equity securities after the deduction of liquid assets. Warrants and money market instruments are restricted to a maximum of 33%.

For cost and diversification reasons, Avadis Asset Growth invests in target funds of the Avadis investment platform whenever possible. These comprise institutional funds launched for retirement provision institutions. Should a suitable target fund for the investment category not be available on the platform, the target fund is selected according to the best-in-class approach.

The objective is for investors to be able to participate in long-term global economic growth with a broadly diversified, risk-controlled portfolio.

The strategy fund largely pursues an indexed approach. The risk profile of the portfolio is kept constant by regularly resetting the original weighting of the investments (rebalancing).

The strategy fund offers the investor the following further important features:

- Investors can buy and sell the strategy fund each month
- Earnings are distributed to the investors annually and reinvested immediately
- Transaction costs incurred on the purchase and sale of the underlying institutional target funds are charged to the fund assets and therefore lower the return
- Recommendation: This collective investment scheme may not be suitable for investors wishing to withdraw their money again within a period of 13 years.

Risk and return profile

The above indicator illustrates the risk and return properties of the funds. Based on its value fluctuations over the last five years, the fund is allocated to the above category.

The risk category can vary over time. The lowest category does not represent a risk-free investment.

Past performance is no guarantee of future development.

The fund does not offer any guaranteed return and measures to protect the investments.

The fund largely entails value fluctuation risks.

The value of the fund can additionally be influenced by the following factors:

- The fund invests in readily tradable assets. However, it is not possible to rule out the risk that in certain extreme situations the tradability of these assets might be restricted. It could be in such situations that the assets can only be sold at a loss, which would result in an impairment of the fund's value.

Charges

The following costs apply to the administration, distribution and marketing of the fund. They are charged to the returns and therefore lower the performance of the fund.

Costs borne by the investors

Issuing commission	none
Redemption commission	none
Conversion fee	none

This comprises the highest percentage that can be deducted from the subscription amount of the investor.

Costs charged to the fund assets in the course of the year

Operating costs	0.55%
-----------------	-------

Costs charged to the fund assets under certain conditions

Performance fee	none
-----------------	------

The running costs are calculated at the end of the financial year. The amount may vary from year to year. They do not include transaction costs incurred on the purchase and sale of the underlying institutional target funds.

Please consult the fund prospectus for further details on costs. It can be retrieved at www.avadis.ch.

Previous performance

Past returns provide no indication of current or future performance.

The performance includes all costs

The strategy fund was launched in 2009 and constitutes a continuation of the Strategie Aktien of ABB Asset Growth Foundation, the portfolio of which was transferred to the Strategie Aktien subfund of Avadis Vermögensbildung SICAV as of 01/01/2009.
